

WEBSITE SETUP OPTIONS & PRICING

Client, Admin Portal & Website

This document lists out specific tools that need to be used to make our new website fast, secure and be able to send automated emails. Price quotes are based on current market prices.

1. Website Domain Name (The Web Address)

A domain name (e.g., yourcompany.com) must be purchased. Domain registries charge annual fees to keep the address active.

Provider	Cost	Why Choose This?
Cloudflare Registrar	\$9 to \$11 / year	Sells domains "at wholesale cost" without hidden markups or price hikes upon renewal.
Standard Registrars (GoDaddy, etc.)	\$12 to \$20 / year	Often cheaper for the first year (\$2-\$5) but increases significantly upon renewal.

2. Website Security & Speed (The "Digital Bouncer")

We need a service that handles traffic, blocks malicious attacks, and optimizes heavy file delivery (like project PDFs or blueprints).

Service & Tier	Cost	Why Choose This?
Cloudflare (Free Tier)	\$0 / month	Industry standard. Completely free firewall, DDoS protection, and global speed optimization.
Cloudflare (Pro Tier)	\$20/mo (Annual) or \$25/mo (Monthly)	Upgrades the firewall to professional grade, custom security rules, and automatic image optimization.
Bunny.net	\$1 / month minimum (Pay-as-you-go)	Extremely cheap alternative if you only want rapid blueprint/file delivery with standard protection.

3. Automated Emails (The "Post Office")

To send email verifications when clients sign up and push automated updates when new blogs or project milestones are posted.

Service & Tier	Cost & Limits	Why Choose This?
Resend (Free Tier)	\$0 / month (Up to 3,000 emails/mo)	Perfect for launching. Gives you clean delivery up to 100 emails per day for free.
Resend (Pro Tier)	\$20 / month (Up to 50,000 emails/mo)	Removes the daily cap entirely. Best choice once the client list or blog audience starts scaling.
Brevo (Free Tier)	\$0 / month (Up to 300 emails/day)	Provides a higher monthly allowance (approx. 9,000/mo) for free, restricted to a 300 daily limit.
Brevo (Starter Tier)	Starts at \$9 / month	Removes daily limits and expands monthly sending capabilities affordably.

Selection Tab

Please review the options above and indicate the chosen configuration:

Domain Name: _____

Security & Speed Provider: _____

Automated Email System: _____
